### **Vision Document**

#### **Department of Surgery GMC Baramulla**

The Department of Surgery at our Medical college envisions becoming a global leader in surgical education, research, and patient care. Through innovation, collaboration, and excellence, we strive to shape the future of Indian Medical Graduates, empower the next generation of surgeons, and Improve the health outcomes of Individuals and communities.

#### **Mission Statement**

Our mission is to provide exceptional surgical education, deliver compassionate patient-centered care, and conduct ground breaking research to advance the field of surgery. We are committed to fostering a culture of continuous learning, clinical excellence, and professional development among our faculty, residents, and students. Our interdisciplinary approach encourages collaboration with other departments, institutions, to achieve optimal patient outcomes and contribute to the advancement of surgical science.

#### **Core values**

1. We pursue excellence in all aspects of surgical practice, education, and research, upholding the highest standards of quality and safety. We strive for continuous improvement and embrace evidence-based practices to deliver outstanding surgical outcomes.
2. We recognize the importance of empathy, respect, and dignity of patients. We prioritize the holistic well-being of our patients, acknowledging their unique needs and

supporting them through their surgical journey with sensitivity and compassion.

3. We foster a culture of teamwork and collaboration, embracing interdisciplinary approaches to optimize patient care. We actively seek partnerships with other healthcare providers, academic institutions, industry leaders, and community organizations to leverage collective expertise and enhance surgical advancements.
4. We encourage a spirit of innovation and forward-thinking, embracing new technologies, techniques, and research methodologies. By promoting a culture of creativity and intellectual curiosity, we aim to drive transformative breakthroughs in surgical practice and contribute to the advancement of medical science.

### **Strategic Goals**

1. Enhance the surgical education program by implementing innovative teaching methods, recommended by NMC, promoting experiential learning opportunities, and integrating cutting-edge technology into the curriculum. Foster a culture of mentorship, lifelong learning, and professional development among faculty, residents, and students.
2. Establish an environment of clinical innovation by embracing emerging surgical techniques, technologies, and evidence-based practices. Establish specialized centre of excellence to address complex surgical diseases and promote multidisciplinary collaboration.
3. Invest in research infrastructure, and provide resources for surgical research. Encourage talented investigators/researchers to strive to improve.

- 4 Continuously improve patient care by implementing patient-centered approaches, streamlining processes, and enhancing patient experience. Develop comprehensive care pathways and ensure seamless coordination across surgical specialties to provide the highest level of care from preoperative evaluation to postoperative follow-up.
- 5 Engage with local, national, and global communities to promote awareness, education, and access to surgical services. Collaborate with community organizations and healthcare providers to address health disparities, contribute to surgical outreach programmes, and empower under attended populations.
- 6 Create a reliable scientific data bank as a source of information for scientific interpretations and implementations while respecting the individual privacy.

By pursuing these strategic goals, the Department of Surgery at our medical colleges aims to shape the future of surgery, advance surgical knowledge, and deliver exceptional patient care. Together, we will inspire and empower the next generation of surgeons who will make a lasting impact on the health and well-being of individuals and communities.
